

CEAN

Dr. Cici Brown, President

WELCOME TO AEMPIN

For over Twenty-five years Americas Empowerment Institute "AEMPIN" has continuously developed its efficiency and augmented its resources. In doing so, it has become a leading project management, telecommunications, finance, procurement, public governance and sustainable development training firm.

In addition to our headquarters in Houston, Texas USA, AEMPIN operates a network of training centers around the world in London (UK), Dubai (UAE), Abuja (Nigeria) and Madrid (Spain). Yearly we welcome over 1000 delegates from public and private sectors. The outstanding proficiency of our team of permanent consultants in conjunction with our administrative staff, guarantees a highly professional training and a reliable assistance during your stay.

Moreover, drawing on our experience and reputation, we are proud of having developed in cooperation with Texas Southern University College of Continuing Education, four Professional Certification Programs for qualified individuals: Certified Telecoms Managerial Specialist, Certified Utility Managerial Specialist, Certified Procurement Specialist and Certified Regulation Managerial Specialist.

AEMPIN is more than a training and consulting school. We are a capacity building institute. We take enormous pride in our ability to deliver practical results for our clients. I encourage you to browse through our website www.aempin.org and learn more about AEMPIN. Please contact us.

ABOUT AEMPIN

Americas Empowerment Institute (AEMPIN) is a world leading capacity building firm with over 25 years' experience in providing specialized and highly rated training in the areas of information technology, architecture, law, governance, public procurement, leadership & management, finance, regulation, utility and telecommunications. AEMPIN has trained over 35,000 officials from 63 countries across the globe.

ACCREDITATION

Americas Empowerment Institute is approved and accredited by Career Schools and Colleges of the Texas Workforce Commission. Career Schools and Colleges has statutory responsibilities in Texas regarding non-public, post secondary, educational institutions. Career Schools and Colleges are regulated under Title 3, Texas Education Code, chapter 132, and Title 40, Texas Administrative Course, Chapter 807. For more information contact: Career Schools and Colleges 101 E. 15th Street, Austin, TX 78778 or call 512-936-3100.

TEXAS SOUTHERN UNIVERSITY

Texas Southern University (TSU) is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award baccalaureate, masters, and doctorate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Texas Southern University.

AEMPIN and TSU are responsible for the overall management and administration of each professional certification program, including participant enrolment and counselling, development and maintenance of quality standards, and individual course approval. To date, over 160 professionals have completed certification with over 119 more slated over the next two years.

AEMPIN is registered with NASBA as a sponsor of CPE

AEMPIN employs leading faculty and staff

Nelson Ilodigwe, Ph.D.
Executive Director

Glen Woods, Ph.D.
Global Initiative Director

Professor Wythel Price
Program Chair and Lead Faculty

Dr. Ilodigwe is responsible for strategic planning and global management of the firm. His primary role is to oversee the day-to-day implementation of the corporate strategic plan. In addition to his corporate management, Dr. Ilodigwe has over twenty-five years' experience designing, directing, and teaching executive training courses and workshops in private sector development, small business development, government policy, non-profit management, international business, and technology innovation. He has personally designed curriculum for, and taught in over 250 workshops, with durations of one to four weeks. He has trained more than 20,000 participants from 63 countries worldwide. Dr. Ilodigwe, a versed international development expert in capacity-building and policy advisory, was Senior Manager Democracy Program at Jimmy Carter Center and ex-Director of Africa and Middle East Project at Clinton Global Initiative. Dr. Ilodigwe received his B.A. in Political Science and M.P.A. in Public Administration from the Texas Southern University and Doctorate of Philosophy in Management and Organizations from the University of California at Los Angeles (UCLA).

Dr. Glen Woods is the Global Initiative Director. He leads capacity building and consulting efforts at the Americas Empowerment Institute, focused on developing countries and emerging economies. He brings over 25 years of experience in the public sector, focusing on government regulations, public utilities, and telecommunications where he led the business development and relationship building across all infrastructure sectors, including power and energy. Mr. Woods brings with him an intimate knowledge of public sector governance in the United States and Australia, innovative financing programs of the U.S. federal government, and an understanding of political decision making, inter-national project finance, economics, strategic planning, and business negotiations and communications. During his career, he has advised on numerous utilities in the U.S and Canada. He has a Master of Arts in International Economics from the Georgetown University, Washington, D.C, and a Doctor of Philosophy in Information Technology and International Relations from Stanford University.

Professor Wythel Price is Program Chair and Lead Faculty at Americas Empowerment (AEMPIN). Under the direction of the Executive Director, she is responsible for developing and maintaining the quality and effectiveness of program curriculums. She works with faculty to promote continuous improvement of the quality of instruction and develops recommendations regarding scheduling, resource allocation, course delivery and instructional program planning. She received her Master of Arts in Organizational Management from the University of Phoenix in Phoenix, Arizona. Throughout her 30-year management career, she has received numerous IT certifications in Network Implementation and Project Management. She has had successful careers in Sales, Implementation and Call Center Management with AT&T and Xerox Corporations. In addition, she has served as a trainer for United Airlines during the Continental/United merger, call center trainer for the Methodist Hospital Nurse Triage Unit and was a Customer Care Manager with Continental Airlines. She served as the former president of AT&T's Community Network serving more than 15,000 minority employees and has been an editor for two major publications.

Certified Telecoms Managerial Specialist

Location: Houston, Texas USA

CEUs: 24.0

Professional credentials assure customers, organizations leadership and business associations, that they are working with people who are knowledge-able and possess current competencies in their respective industries. Participants will receive a “stamp of excellence” which represents their ability, aptitude and distinction among their peers.

Benefits for Participants

- Opportunity to receive valuable training in a quality learning environment
- Develop lifelong learning habits and a wide range of skills making them more marketable
- Obtain recognition for their achievements, talent and hard work
- Provides a building block for those who wish to advance their education and professional development.

Benefits for Employers

- Helps to build a more talented staff
- Aids in employee motivation and creating a positive and professional work environment
- Helps to identify those employees that want to succeed and aids in succession planning.

Target Audience

- Telecommunications managers and personnel involved in telecoms regulation and policy-making
- Telecommunications senior official in any department
- looking to complement their skill-set by gaining a good understanding of telecommunications regulation

Overview

The Certified Telecoms Managerial Specialist Program was designed to transform participants into subject matter experts in the field of Telecommunications by further developing the core knowledge, skills and abilities that telecommunications professionals require. Our goal is to use knowledge management and global best practices to give industry leaders, managers, and government officials that are responsible for the telecommunications process, the confidence to direct teams to achieve the organization's business goals through use of key telecoms concepts, principles and policies to which ICT authorities are expected to adhere. We will do this by bringing forth various issues that dominate telecommunications, as we identify the potential challenges, evaluate various telecommunications processes, and recommend strategic techniques and tactical methods, that are internationally accepted standards and procedures.

Course Objective

The objective of this course is to enable telecommunications professionals to effectively understand and overcome governance issues, manage ethical issues and anticipate disruptive change while working towards the creation of transformational change in order to influence the future of the organizations, companies and communities in today's telecommunications environments. It focuses on fourteen telecommunications best practices which offer a proven methodology that enables effective telecommunications management. The course includes discussion and analysis of the key issues and tools available to ensure a fair and equitable telecom environment.

Objectives

- Obtain a sound understanding of the global and competitive telecommunications environment and its impact on the activities of a regulator
- Understand the key principles of regulation including competition policy and licensing and the role and responsibilities of the regulator in these areas
- Understand the role and responsibilities of the regulator with respect to interconnection and tariffs the regulatory issues represented by scarce resources including numbering and spectrum management
- Understand important dispute resolution mechanisms and the role of the regulator in settling disputes
- Gain an understanding of the tools available to deal with the regulatory challenges of today's world

Overall our objective is to ensure participants gain an educational advantage and a greater satisfaction through

increased learning in acquiring a more professional approach to their work.

The Certified Telecoms Managerial Specialist Course Outline Includes the Following topics:

- Overall Picture of the Global and Competitive Telecommunications Environment
- Regulation.
- »» Experiential Exercise: The Regulatory Strategy Checklist
- The Regulator
- Competition policy and Safeguards Price Regulations
- Licenses
- »» Experiential Exercise: Review and Discussions: Typical Steps in a Competitive
- Licensing Process
- Network Access and Interconnections
- Local Loop Unbundling (LLU)
- Voice Over Internet Protocol (VoIP)
- Cost and Cost Modelling
- Order Management Process and Resource Required
- Protecting Consumers
- »» Experiential Exercise: Comprehensive Planning Approach: The three Phase Customer Experience Improvement Framework
- Management Competencies: Staffing and Training
- Universal Service and Universal Access
- Next Generation Network Policy and Regulation
- Oral Presentation
- Developing a Telecommunication Strategic Plan.

This Course requires Two (2) prerequisites to be chosen from the following:

- Call Centre Management: Customer Service and Workforce Operations Certificate.
- Strategic Fundamentals of Telecommunications
- Strategic Operational Strategies for Telecom Executives
- Telecoms Code of Practice Regulators
- Next Generation Networks
- Global Telecoms Outlook 2021
- Telecoms Officers Competency Building and Sustainability Techniques
- Next Generation Challenges & Opportunities for Telecoms Officers Skills Development
- Regulatory Compliance Monitoring and Enforcement in Telecoms
- New Trends in ICT Consumer Education, Protection, Responsibility, Stakeholder Rights and Conflict Resolution.
- Human Capital Management challenges and Corporate Sustainability Techniques
- Emerging Trends in Telecommunications
- Economics of Regulation
- Regulating Telecoms Quality of Service: Planning, Compliance, Monitoring and Enforcement
- Effective Leadership and Communications Management in Public Sector
- Regulatory Challenges and Opportunities of Value-Added Service
- Global Best Practices of Auditing Telecommunications Companies
- Effective Project Management in Telecommunications
- Global Management, Leadership and Risk Assessment Strategies
- Effective Leadership and Communications Management in Public sector
- Entrepreneurial Techniques for Managing Government Organizations and State-Owned Enterprises,
- Global Best Practices in Managerial Excellence
- Regulating and Monitoring Public-Private Partnership
- Strategic Thinking, Planning and Risk Management in the Public Sector
- ICT Governance: Building Capacity and Sustainability
- Effective Techniques for the Performance Management Process (PMP)

- International Best Practices in Project Planning, Monitoring, and Evaluation
- Human Capital Management Challenges and Corporate Sustainability Techniques
- Business Essentials for Utility Engineers: Understanding and Influencing Finance Decision-Making
- Emerging Telecoms Regulations Essentials
- Best Practices for Regulation, Security and Effective Management of Mobile Money in Developing Countries
- International Best Practices in Managing Mobile Number Portability (MNP)
- Global Trends in Competition and Pricing Issues in Telecommunications
- Next Generation Challenges & Opportunities for Telecoms Officers Skills Development
- Essential Trends for Universal Service Provision Fund (USPF) Projects
- Best Practices in Monitoring and Evaluating of Development Assistance Projects: New Techniques for Independent Monitors and NGOs

Certified Utility Managerial Specialist

Location: Houston, Texas USA

CEUs: 24.0

Overview

The Certified Utility Managerial Specialist Program was designed to enhance the knowledge, professionalism, industry standing and effectiveness of mid and senior-level utility managers interested in improving their management communications, leadership skills and overall value to the public and communities they serve. The core competencies, knowledge gained and demonstrated understanding of the information, will prepare utility managers for success in all utility related industries as well as lead to increased confidence by the utility managers and the utility governing bodies. The program will set the standard for which to advertise, hire, and compensate employees. Thus, leading to better utility management which will benefit, improve, and further the industry. Our goal is to provide a highly interactive and integrative professional development program by using knowledge management and global best practices. Providing industry leaders, managers, and government officials that are responsible for utility management, the confidence to direct teams to achieve the organization's business goals through use of key managerial concepts, and the principles and policies to which leaders are expected to adhere. We will do this by bringing forth various issues that dominate managers in the utility industry as we identify the potential challenges and coach participants on the development of strategic techniques and tactical methods through utilization of presentations, case studies, and experiential exercises designed to engage leaders and deepen their learning. a proven methodology that enables effective public utility management.

Benefits for Participants

- Opportunity to receive valuable training in a quality learning environment
- Develop lifelong learning habits and a wide range of skills making them more marketable
- Obtain recognition for their achievements, talent and hard work
- Provides a building block for those who wish to advance their education and professional development

Benefits for Employers

- Helps to build a more talented staff
- Aids in employee motivation and creating a positive and professional work environment
- Helps to identify those employees that want to succeed and aids in succession planning

Target Audience

- Directors, Sr Level Managers and Key Staff in Utility Management
- Managers of Regulatory Agencies and Commissions
- Executives and Policy Makers in Human resources and Capital Management
- Directors and Managers in Human Resources and Capital Management
- Directors and Managers of Strategic Planning and Contract Management
- Industry leaders in utility firms, consumer groups and government

Course Objective

The objective of this course is to enable utility management professionals to effectively understand management theories and related management competencies, implement best practices in HR management, overcome governance issues, manage ethical issues and anticipate disruptive change while working towards the creation of transformational change in order to influence the future of the Organizations, companies and communities impacted by the utility industries. It focuses on 10 Leadership and Public Utility Management best practices and Key concepts which offer a proven methodology that enables effective public utility management.

Objectives:

- Introduction: The Leader's Role in the Utility Industry Environment
- Management Theories and Skills as applied to the Utility Industry.
- Strategic Planning and Design Making.
- Human Resources Management Global Best Practices
- Effective Operational Practices.
- Managing Regulations and Stakeholders.
- Risk Management in the Utility Industry
- Responding to threats and Competition in the Industry
- Information technology and technological implications in the Industry
- Accessing Leadership skills and Competencies 360 Access Leadership Assessment.

The Certified Utility Managerial Specialist Course

Outline includes the following topics:

- Introduction: The leader's role in the Utility Industry environment
 - »» Experimental exercises: Leadership Competencies Self-Assessment
 - »» Critical thinking: The Six types of Socratic questions
- Management Theories and Skills as applied to the Utility industry
- Strategic Planning and Decision Making

2024 EXECUTIVE COURSE SUMMARY

01 – Data Protection and Trust. 6.0 CEUs

Location and Date:

Houston, TX USA: Mar 11-15, Apr 8-12

Dubai, UAE: May 20-24

Course Overview

Data are sometimes described as the “oil of the digital economy” while their use in the digital economy is sometimes referred to as “surveillance capitalism.” While the former has relatively benign connotations, the latter directly provokes concerns about the use of personal data. This course focuses on regulatory aspects of data with an emphasis on personal data.

Course Objective

- The objective of this course is to examine the nature of data protection regimes, focusing particularly on its regulatory aspects – a feature that results in interesting similarities with the telecommunication sector.
- It examines the extent to which emerging technology and services should, and could, be impacted, as well as the controls over the cross-border flow of personal data and the resultant trade implications.
- Data protection and privacy concerns particularly overlap when considering the need for special rules to govern our communication activities.
- The complex intersection between data protection and information security is also examined.
- Finally, some key considerations for regulators are offered.

Course Outline

- Data Protection Regimes
- Regulatory Authorities
- Technologies and Services
- Transfers and trade implications
- Communications Policies
- Data Protection and information Security
- The ITU Guidelines on Child Online Protection
- Enhancing the Protection and Cyber-Resilience of Critical information infrastructure

Target Audience

This course is for Relevant Staff, Principal Managers, Senior Managers, Assistant Directors, Deputy Directors, and Director

Tuition: \$4,000

**Additional
information,
detailed objectives
and outlines for each
course are available

02- Emerging Technologies. 6.0 CEUs

Location and Date:

Houston, Texas USA: Mar 25-29, Jul 1-5, Nov 18-22

Dubai, UAE: May 13-17

Course Overview

The digitization of societies and economies is continuously generating record amounts of data. Digitization is driven by increased and faster connectivity of people and things. Fibre to the home (FTTx) and fast mobile networks provide the opportunity to engage in digital activities, and social media and user-generated content provide the motivation for it. At the same time, more objects become “smart”, i.e. connected to the Internet to receive and send data. As a result of the explosion of data, new technologies have evolved that help to sift through data and derive value from combining and analyzing large data sets. These technologies are often described in umbrella terms such as artificial intelligence (AI) and big data.

The new technologies require ICT regulators to reconsider the tools they deploy to facilitate fair competition in the ICT sector and protect consumers. New technologies also pose legal, ethical, and macroeconomic challenges. Central banks, consumer protection agencies, competition commissions, and ICT regulators scramble to assess the implications for their fields of responsibility. The implication is that roles of sector-specific regulators such as for the ICT sector, water, electricity, and banking, and subject-specific regulators such as a consumer protection agency or the competition commission may need to be redrawn and, in some cases, more specialized regulators may need to be established.

Course Objective

- The objective of this course is to discuss the general trend in redefining the roles of the various regulatory authorities in response to cloud computing, AI, blockchain, big data, and the Internet of Things (IoT).
- While the desired outcomes – fair competition, consumer protection and economic development – remain the same, the approaches to achieve them are changing across time and differ between countries.
- This course aims to provide a framework to identify a suitable regulatory approach in response to arising technologies. The next section explains selected technologies in the context of the Internet value chain and evolving ICT sector business models. The last section discusses the evolving regulatory environment and options for allocating regulatory responsibilities to sectoral and/or functional regulators.

Course Outline

- Evolving technologies
- The evolving Internet value chain
- The evolving business models in ICT sector
- Emerging technologies (AI) challenges and principles of regulation

Target Audience

This course is for Relevant Staff, Officers, Principal Managers, Senior Managers, Managers, and Deputy Managers

Tuition: \$4,000

03-Mastering Telecommunication Regulation. 6.0 CEUs

Location and Date:

Houston, TX USA: Jun 5-7, Nov 4-8

Paris, France: Sep 4-8

Dubai, UAE: Oct 9-13

Course Overview

This course is designed as an introduction to telecommunications regulation for staff development. It explores A-Z elements for best practice regulation. The last decade of the 20th Century saw unprecedented changes in the global telecommunications industry. Numerous state-owned telecommunications operators were privatized, and a wave of pro-competitive and deregulatory tele-communications policies swept the world. New market-based approaches to the supply of telecommunications services were introduced in scores of countries. The focus is on mastering telecommunications regulatory principle and governance.

Course Objective

- The objective of this course is to explore the telecommunications regulation from A-Z
- Demonstrated need to regulate
- The most efficient measures selected to meet the specific regulatory objectives

Course Outline

- Review of why regulating telecommunications
- Expansion of telecommunications regulation
- Understanding the principles of effective regulation
- Liberalization of telecommunications markets
- Serving customers better
- Telecommunications networks, and to introduce new services
- Growth of the Internet and the introduction of many new service providers
- Growth of mobile and other wireless services
- Introduced new service providers to tele- communications markets
- Development of international trade in telecommunication services

Target Audience

This course is for Relevant Staff, Principal Managers, Senior Managers, Managers, Deputy Managers, and Officers

Tuition: \$4,000

04 – Cybersecurity: Using Data Science as a Game Changer. 6.0 CEUs

Location and Date:

Houston, TX USA: Jun 3-7, Nov 4-8

Dubai, UAE: Sep 2-6

Course Overview

The global cybersecurity landscape is expanding and changing rapidly. Organizations large and small are responding to heightened risk as traditional security methods give way to the emergence of real-time identity authentication methods.

According to Mordor Intelligence, the cybersecurity market is expected to be worth \$352.25 billion by 2026, with an annual growth rate of 14.5%. Accenture polling indicates that 68% of business leaders feel their cybersecurity risks are increasing.

However, the low level of existing protection may be even more concerning—on average, only 5% of companies are properly protected (Varonis). A key element in the cybersecurity toolbox is the strategic understanding of the role of data science in increasing cybersecurity resiliency at an enterprise level. Leaders can harness data science methods to manage cyber risk to improve and, in some cases, create new control capabilities to achieve cybersecurity resilience.

Course Objective

- Advice on cutting-edge strategies necessary to advance your career in cybersecurity.
- Skill to understand the correlation between data science and Cybersecurity risk at an enterprise level.
- Insight on how traditional methods are transitioning into more sophisticated cybersecurity systems using data science methods.
- Knowledge on new and emerging systems.
- Insight in identifying and analyzing patterns for deviations and threats.
- Skills to develop innovative practices to attract, retrain, and retain talented cybersecurity personnel.

Course Outline

- Learn how to improve your organizations' preparedness and response against cyberattacks and grow your careers as leaders in robust cybersecurity strategies.
- Gain an overall understanding of how data science and cybersecurity work together to create quality data inputs that result in effective key performance indicators (KPIs).
- Learn how using data science methods enhances the resilience of cybersecurity at the enterprise level.
- Learn to collaborate with cybersecurity and data science professionals to create new control capabilities to achieve cybersecurity resilience.
- Learn how to hire and develop talent in these practices at the enterprise level.

Target Audience

This course was designed to provide relevant staff, officers, deputy, Managers, managers, mid-level cybersecurity and data science professionals with a strategic understanding of how data science can be used to manage cyber risk, positioning them for career progression as cybersecurity specialists.

Tuition: \$4,000

05 – Climate Change and its Effects on Debt and Debt Management in African Countries CEUs: 6.0

Location & Date: Houston, TX USA: Jun 3-7, Nov 4-8 UYO, NIGERIA: Apr 22-26 Amsterdam, Netherland: Sep 2-6
CEUs: 6.0

Registration Discount: \$3,900 – You must Register 60 days in advance and payment must be Paid In Full 30 days prior to the start of class.

Introduction:

Climate change poses significant challenges globally, but particularly for African nations. The impacts of climate change, such as extreme weather events and changing agricultural patterns, have far-reaching consequences on debt sustainability and management in the region. This course aims to provide you with a comprehensive understanding of the relationship between climate change and debt in African countries and equip you with strategies for effective debt management in this context. At the conclusion of this course, participants will have gained a comprehensive understanding of how climate change affects debt and debt management in African countries. You will be equipped with the knowledge and strategies necessary to navigate the challenges of climate change and ensure sustainable debt management in this context.

Course Overview:

This course will delve into the complex dynamics between climate change and debt in African countries. Through this course, you will explore the unique challenges faced by African nations, the ways in which climate change influences their debt burdens, and the strategies to mitigate these risks. We will also examine the role of international financial institutions and policies in supporting climate-resilient debt management in African countries.

Course Objectives:

The objectives of this course are as follows:

- Understand the specific vulnerabilities of African countries to climate change and their implications for debt sustainability and management.
- Examine the relationship between climate change and debt, including the drivers of climate-induced debt, impacts on fiscal budgeting, and debt repayment capabilities
- Analyze the financial risks and challenges African countries face due to climate change, including the increased need for climate-related investments and the potential impacts on credit ratings
- Explore strategies and best practices for climate-resilient debt management in African countries, including financing mechanisms, risk assessment, and adaptation strategies
- Identify policy interventions, international support, and innovative approaches to enhance debt management and climate resilience in African countries

Course Content Modules:

Module 1: Climate Change Vulnerabilities in African Countries

Understanding the unique climate challenges faced by African nations

- Examining the socio-economic impacts of climate change in various sectors
- Assessing the vulnerabilities of African economies to climate-related risks.

Module 2: Climate Change Impacts on Debt in African Countries

- Analyzing the linkages between climate change and increasing debt burdens
- Exploring the impacts of climate-induced damages on fiscal budgets and debt sustainability
- Examining the implications of climate change on credit ratings and borrowing costs.

Module 3: Climate-Resilient Debt Management Strategies

- Identifying strategies for climate-resilient debt management in African countries
- Evaluating financing mechanisms and financial instruments for climate-related projects
- Assessing risk assessment frameworks and tools for climate resilience in debt management.

Module 4: International Support and Policy Interventions

- Analyzing the role of international financial institutions in supporting climate-resilient debt management
- Exploring policy interventions for enhancing climate resilience in debt management
- Discussing innovative approaches and partnerships to address the climate-debt nexus in African countries.

Tuition: \$4,000

06- Global Best Practices in Managerial and Leadership Excellence 6.0 CEUs

Location and Date:

Houston, TX USA: Mar 18-22, Apr 22-26, Jul 8-12

Paris, France: Jul 8-12

07- Leading and Managing Crisis During Disruptive Change 6.0 CEUs

Location and Date:

Houston, TX USA: Jun 10-14, Oct 21-25

Paris, France: Jun 10-14

Munich, Germany: Jun 3-7, Aug 5-9

Course Overview

The world has been turned upside down because of the global pandemic. The principles of good leadership remains the same but the skillset has changed. Leaders need to be agile and creative as they lead through strenuous conditions. The course tailors leadership and management training as it pertains to the public service sector. The skill set that needs to be developed includes leadership and decision-making, crisis management, organizational management, human capital development, navigating through political waters, and effective communications. The case studies are designed to address key issues in developing countries and emerging economies.

Course Outline

- Leading Teams and Organizations
- Leading through a Crisis
- Crisis Communications
- Making Decisions at Zen
- Developing personal leadership competencies: self-awareness; courage; vision; strategic and analytical thinking; learning agility; decisiveness; energy; results; credibility; influence; communication
- Planning for and achieving team and organizational results
- Building and maintaining relationships
- Building diversity
- Fostering innovation
- Handling risks, changes, complications and conflicts
- Cultural adaptation

Managing Teams and Organizations

Team and organizational management skills in respect to change, communication, conflict, constraint, crisis, decision, finances, human resources, information, operations, perceptions, performance, process, projects and programs, quality, resources, risk, skills and strategy

Leadership and Management in developing and emerging economies

- Meeting donor and key stakeholder requirements
- Building strong relations with strategic partners
- Executing in challenging political environments
- Working with limited resources
- Institutionalizing open and participatory communication channels.

Tuition: \$4,000

08- Emerging Trends and Improved Effectiveness in Public Service Delivery 6.0 CEUs

Location and Date:

Houston, TX USA: Jul 15-19, Oct 7-11

Istanbul, Turkey: Nov 11-15

Course Overview

This course is designed to explore core principles and various methodologies on how to improve the overall effectiveness of public service delivery to ensure positive impact on the communities being served and to provide senior public officials and members of public institutions with best practices and techniques enabling them to command the trust of the public which they serve.

Our goal is to increase participant's knowledge and understanding on how to aid in developing individual performance, build human resource capacity and reduce corruption and dishonesty in order to develop inspiring leaders who can develop, monitor and maintain good governance practices that deliver efficiency and effectiveness in public services.

We will do this by bringing forth various issues and challenges that impact strategy, policies, procedures and people and discuss necessary measures to ensure continuous improvement in order to make the public sector results-oriented and effective and support successful reforms in the public sector. Through utilization of focused lectures, group discussions, experiential exercises, case studies, and review of best practices designed to engage participants and deepen their learning, we will explore different ways to establish informed and committed leadership who are not only responsible but accountable for transparency, public awareness, managing and communicating change and other necessary components required for effective and sustainable corporate governance.

Course Outline

- Developing Effective Public Service Delivery
- Emerging Trends The Future of Public Service Delivery
- Case Study: Delivering Public Service for the Future: Canada Government Profile
- Leadership and Strategic Performance Management
- Case Study: When Leaders Fail and How They Recover
- Ethics, Standards and the Achievement of Improved Performance
- Case Study: An Ethical Dilemma
- Policy Reform: Process, Planning and Structure
- Managing the Public's Perception

Target Audience

This course is for Senior Managers, Directors, Deputy Managers, Policymakers, Commissioners, Politicians, Chief Executives, Senior Administrators and Leaders in the public sector, and coordinators responsible for monitoring performance and other key stakeholders

Course Outline

- Developing Effective Public Service Delivery

09- Emerging Corporate Governance in Public Sector 6.0 CEUs

Location and Date:

Houston, TX USA: Jul 8-12, Oct 7-11

Munich, Germany: Jun 3-7, Aug 5-9

Course Overview

Government-owned and private enterprises in today's global market are facing the dual challenge of earning a relationship of trust with both their customers and investors. Successful enterprises will be those that enact effective policies that enable shareholders and investors to make informed decisions and participate in a company's activities through transparent and clear corporate procedures. In this course, participants will become familiarized with the tools and requirements of corporate governance to ensure compliance and instill confidence. AEMPIN's team of training experts offers practical experience with top presentation skills.

Course Outcomes

- Evaluating shareholder value and attract new investment
- Comparing the linkages between effective corporate governance and the Board of Directors
- Applying international best practice standards in financial and legal disclosure requirements
- Illustrating how to comply with national and international corporate governance standards
- Illustrating how to create a corporate social responsibility strategy
- Creating your own corporate governance Action Plan to implement in your organization.
- Engaging and building professional relationships with your fellow participants

Target Audience

This program is designed to meet the needs of managers, directors, board members, chairs, secretaries, and commissioners of publicly held companies and established companies.

Course Outline

- Designing and Enforcing Corporate Governance Programs for Public and Private Enterprises
- Understanding the main elements of corporate governance
- Developing strategies to counter vested interests, asset stripping, and corporate waste of resources
- The role of corporate social responsibility in competitiveness
- Developing Corporate Governance Rules and Procedures
- Redesigning a corporation's by-laws
- Conducting a general shareholder's meeting
- Defining roles, responsibilities, and functions of the Board of Directors and committees
- Electing board members and committee positions
- Methods of achieving transparency in management and implementation of key company activities to include restructuring and share repurchasing
- Understanding the purpose and methods of disclosure
- Accounting Standards Board (IASB)
- Designing laws and regulations to govern the relationships among corporate managers, entrepreneurs, and investors

Tuition: \$4,000

010- Essential Management Skills for Emerging Leaders 6.0 CEUs

Location and Date:

Houston, TX USA: Mar 4-8, Jul 22-26

London, UK: Jun 17-21

Paris, France: Sep 2-6

Dubai, UAE: Jul 22-26

Course Overview

Organizations across every industry are facing complex organizational challenges that require the rapid development of new and agile leaders. More than ever before, emerging leaders must quickly learn and deploy core management skills, develop a broad strategic perspective, take their leadership skills to the next level, and expand their professional and personal networks.

Presented over ten days, this intensive program is designed to help new managers master core business concepts and build key skills in six subject areas, including leadership, strategy, and finance. Participants will gain a cross-functional view through sessions led by instructors specializing in each subject area and through project-based learning.

Course Outcomes

Develop a solid understanding of the core business areas every manager should know. Topics may include, but are not limited to:

- Leadership
- Strategy
- Communication
- Finance
- Marketing
- Build organizational and team management skills
- Learn to map your personal leadership and learning journey
- Improve your collaboration and presentation skills

Course Outline

- Master the core business areas every manager needs to know
- Build organizational, team management, and networking skills
- Understand how managers interact across business functions
- Improve your collaboration and presentation skills
- Develop a project that addresses an organizational challenge
- Build peer support for your team's projects
- Identify your operational and strategic gaps
- Discuss leadership challenges and strategies with peers
- Map your personal leadership and learning journey
- Expand your professional and personal networks

Target Audience

This program is ideal for officers, deputy managers and managers who are looking to rapidly increase their management skills and strategic perspective, taking on additional responsibility, and seeking to be effective in their organization. The program is also appropriate for individuals who are seeking an understanding of high-level business concepts in an intensive format.

Tuition: \$4,000

011- Preparation and Beyond Retirement: Gateway to Better Life 6.0 CEUs

Location and Date:

Houston, TX USA: Jul 8-12, Oct 14-18

Course Overview

This course provides exposure to opportunities that lies within retiring workforce. It provides retooling strategies and techniques for those severing from workforce to embark on a better life beyond retirement.

How will you spend your retirement?

Have you thought much about retirement? Many people think of retirement only in financial terms. However, retirement is an emotional goal as well as a financial one. In fact, it is one of the most emotional transitions you will experience in your life. The earlier you start preparing, the easier it may be to retire in the lifestyle that you choose.

Think of retirement planning as simply a balance between your financial resources and your lifestyle. As a matter of fact, isn't that balance the most difficult one to accomplish in our daily lives? Are we not always trading off, consciously or unconsciously, our today's for our tomorrows? For example, purchasing that larger home with the bigger monthly mortgage payment may mean that a lot less will be set aside for retirement.

- Determine your retirement goals
- Identify income and start saving
- What to expect in living expenses after retirement, these expenses usually decrease
- These expenses usually increase...
- Opportunities-after-Retirement

Tuition: \$4,000

012- International Management Competencies for Regulation Managers 6.0 CEUs

Location and Date:

Paris, France: Jul 8-12

Dubai, UAE: Jul 22-26

Course Overview

This course is designed to explore leadership in today's regulated industry environments and to effectively develop and align leaders with the organizations for which they are responsible for regulatory functions. The primary focus is on results-based leadership and management knowledge, skills and practices that make a difference by inspiring managers to align people with the organization's vision and achieve key performance indications, regardless of obstacles.

Our goal is to provide a highly interactive and integrative professional development environment by using knowledge management and global best practices to ensure manager's understanding and ability to improve performance in many critical areas while responding to current and future challenges. We will do this by bringing forth various issues that impact the effective planning, organizing, directing and coordinating of regulation activities and coach participants on the development of strategic techniques and tactical methods through utilization of presentations, case studies, and experimental exercises designed to engage leaders and deepen their learning.

Course Objective

The objective of this course is to enable regulation management professionals to effectively lead and manage the workforce by enhancing their managerial skills enabling them to communicate and promote the organization's specific strategic purpose and lead others to embrace the vision and achieve the organization's goals and objectives. Participants will gain an enhanced understanding of critical management functions and how to plan and problem-solve to achieve effective regulation management through learning and development in the following areas:

015- Mini MBA in Strategic Management and Leadership 24.0 CEUs

Location and Date:

Houston, TX USA: Jun 17-21, Oct 14-18

London, UK: Jun 24-28

Paris, France: Sep 2-6

Dubai, UAE: Oct 14-18

Course Overview

This course is designed to explore the concept of strategic management and business decision-making and the tools, mechanisms and best practices that assist in developing better strategic managers and board of directors. Today's business environment is influenced by a fluctuating economy, greater scrutiny, and increased regulatory requirements, which create critical challenges and a need for businesses to better position themselves through strategic thinking and sound corporate governance. The primary focus is on how strategic management defines the vision of where you want to be and determines the path to get you there using a strong corporate governance model to control and direct the organization so that the mission and objectives are fulfilled.

Our goal is to provide a highly interactive and integrative professional development environment where participants discuss and address challenges faced by boards of directors and managers in their current environment and how to effectively in a manner that adds to the value of the company and is also beneficial for all stakeholders in the long term. We will do this by bringing forth various issues that impact corporate strategy, long-term value creation, overseeing risk management and related regulation, and responding to business sustainability concerns. Through utilization of presentations, group discussions and experiential exercises designed to engage leaders and deepen their learning, we will explore different ways of designing strategy and governing organizations that will focus resources on the activities that create strong value and competitive advantages.

Course Objective

The objective of this course is to enable Managers and boards of directors to effectively plan, implement and govern the business by enhancing their strategic thinking and problem-solving skills, enabling them to communicate, promote and govern the organization's specific strategic vision, mission and objectives. Development of enhanced understanding of critical strategic management functions and problem-solving techniques in the following areas will assist participants in achieving effective corporate governance and management of increasing responsibility and accountability that requires them to have current information, methodologies and perspectives for making critical decisions:

- Achieving Strategic Control and Sound Corporate Governance
- Strategic Positioning
- The Stages of Strategy Development
- Governance Mechanisms: Building a strong and effective organizational culture
- The Board of Directors – Degrees of Involvement
- Conflict Resolution and Crisis Management
- The Dynamics of Power, Influence and Negotiation

Case Study: The Cure for Poor Strategic Thinking-Planning for Success

Learning Outcomes

After completing this course, participants will be able to:

- Utilize techniques to build crisis management skills for improved conflict resolution and problem solving
- Illustrate how to conduct a contingency plan to ensure on-going sound corporate governance
- Understand and utilize negotiation strategies to maximize power and influence
- Identify challenges to achieving strategic control and tactics for improved strategy development
- Prepare a strategic business plan to use in their real world work environment.

Case Study: The Cure for Poor Strategic Thinking – Planning for Success

Tuition: \$5,000

016- Emerging Trends in Telecommunications Regulations 6.0 CEUs

Location and Date:

Houston, TX USA: May 6-10, Oct 7-11

Paris, France: Sep 9-13

Amsterdam, Netherland: Aug 5-9

Course Outline

In this course, participants will learn the key elements to promote sound competition in the telecommunications sector; review the key determinants for effective network interconnectivity, licenses, universal access, and spectrum management; and develop planning tools for enforcing regulation and dispute resolution. The seminar provides exposure to the key “emerging” elements to effectively regulate and license competition in the telecommunications sector. Learn the impact of mobile wireless, 3G, broadband, VoIP and WIMAX on current regulations.

Learn the key network interconnection strategies for better clarity on service and pricing requirements. Learn how to create universal access plans and funding mechanisms. Learn the elements of spectrum management, allocation, and auctioning. Learn about special topics, including convergence, WTO, and dispute resolution mechanisms.

Develop your own telecommunications reform Action Plan for your regulatory body, utility, ministry, or service provider. Use your new laptop computer for Internet research, access to course materials during and after the course, case study analysis, simulation exercises, and to create your Action Plan. Network and build professional relationships with your fellow participants and leading telecommunications regulatory specialists, utility officials, attorneys, and service providers from around the world.

Target Audience

Deputy Managers, Managers, Directors and Key Staff of Regulatory Authorities, Agencies, and Commissions, Communication Ministry Officials, Telecommunication and ICT Enterprise and Utility Managers, Telecommunication Economists, Financial Analysts, Accountants, Managers and Lawyers, Finance and Investment Officials responsible for investment promotion, Staff of Bilateral and International Organizations.

Course Outline

- Next Generation Telecommunication Competition Policies and Licensing Requirements.
- Regulating next-generation communications: mobile wireless, WLL, 3G, mobile broadband, GSM, WIFI, CDMA, VoIP, WIMAX and satellite
- Determining the licensing needs of the various services: radio, television, wireless (data, voice, and multimedia- VoIP & WIMAX), and satellite, Pricing regulations and tariff modeling
- Network Interconnection Strategies and Techniques
- Universal Access Planning and Investment
- Spectrum Management Regulation for Mobile Operators
- Special Topics in Telecommunications and Information Technology Regulation Action Planning

Tuition: \$4,000

017- Strategic Fundamentals of Telecommunications 6.0 CEUs

Location and Date:

Amsterdam, Netherland: Aug 5-9

Dubai, UAE: Oct 7-11

Course Overview

This training program provides participants with a global vision of Strategic Fundamentals of Telecommunications.

Course Objective

- Provide a good understanding of the global telecommunications regulatory environment and its impacts on the business of operators, regulators, and policy-makers
- Present the main international telecommunications organizations, operators, facilities, codes, and services
- Explore the various commercial arrangements and concepts for the exchange of international traffic

- Achieving Team Performance through Coaching and Enhancement
- Mediation and Negotiation for Results

Tuition: \$4,000

020- Mini MBA in Board of Directors & Top Management Performance and Governance 24.0 CEUs

Location and Date:

Houston, Texas USA: Aug 12-16, Dec 2-6

Amsterdam, Netherland: Aug 12-16

Course Overview

Faced with increasingly complex oversight challenges and demands for greater transparency, how can today's boards do more for their companies? In this board of directors Mini-MBA and Top Management program, you will gain a deeper understanding of the board's responsibilities in areas such as financial resilience, strategic direction, executive compensation, and regulatory compliance. At the same time, you will learn how to work more effectively with fellow directors and company management to strengthen governance, achieve performance, manage unexpected crises, and make decisions that drive long-term corporate success.

Key Benefits

This corporate governance program is based on the premise that there is no one best way for boards to operate—rather, each board must develop practices that suit the unique needs of its company and management. As you examine the latest thinking on the internal function of corporate boards, interaction with management, and overall board relations, you will discover how to enhance and focus your own board's efforts.

- Strengthen the impact of your corporate board
- Achieve trust through more positive relationships within the board and with the management team
- Create more efficient governance processes
- Make the most of each board member's time, knowledge, and experience
- Contribute more meaningfully to corporate oversight activities
- Expand your personal and professional network
- Extend your network by learning and working with accomplished executives from various backgrounds, industries, and countries across the globe
- Build relationships with a diverse group of peers who can provide wide-ranging insights into your business challenges and career decisions.

Who should Attend?

This program is designed to meet the needs of board members, chairs, secretaries, and directors of publicly held companies and established companies that are planning to go public or undergo a significant transformation.

What You Will Learn

Through a rich learning experience that includes faculty presentations, case studies, and small group discussions, you and your peers will explore the most important strategic and organizational issues facing corporate boards today—and how the most successful boards are addressing their challenges.

Key Areas

- The board and management
- The board's internal process
- Proactive governance and risk mitigation

Tuition: \$5,000

TEXAS SOUTHERN UNIVERSITY

021– Factoring Externalities in Debt Management CEUs: 6.0

Location and Date:

Houston, TX USA: May 6-10, Aug 5-9

UYO, NIGERIA: Sep 2-6

CEUs: 6.0

Registration Discount: \$3,900 – You must Register 60 days in advance and payment must be Paid In Full 30 days prior to the start of class.

Course Introduction

This course outline provides a general structure for a course on factoring externalities in debt management. It can be further customized and expanded based on the specific needs and requirements of the target audience. By factoring externalities into debt management, governments can make more informed decisions that balance economic, social, and environmental considerations. This approach promotes sustainable development and helps avoid negative consequences for people and the planet.

Course Objectives:

- Understand the concept of externalities in the context of debt management.
- Analyze and evaluate the environmental impacts of borrowing and debt repayment decisions.
- Assess the social implications of borrowing and debt repayment, including income distribution and access to essential services.
- Explore strategies for ensuring long-term sustainability in debt management.
- Learn how to engage stakeholders effectively in the decision-making process.
- Promote transparency and accountability in debt management practices.

Course Content Modules:

Module 1: Introduction to Externalities in Debt Management

- Definition and importance of externalities in debt management.
- Overview of the social and environmental impacts of borrowing and debt repayment decisions.

Module 2: Environmental Externalities in Debt Management

- Understanding the environmental consequences of borrowing and debt repayment.
- Case studies on infrastructure projects and their potential environmental impacts.
- Strategies for aligning debt management with sustainable development goals.

Module 3: Social Externalities in Debt Management

- Analyzing the social effects of borrowing and debt repayment.
- Exploring the relationship between debt and income distribution, poverty, and access to essential services
- Ensuring debt does not exacerbate inequality or hinder social development.

Module 4: Long-term Sustainability in Debt Management

- Assessing debt sustainability and borrowing capacity.
- Evaluating the potential risks of excessive debt burdens.
- Strategies for achieving long-term economic stability and avoiding environmental degradation.

Module 5: Stakeholder Engagement in Debt Management

- Importance of engaging stakeholders in debt management decisions.
- Identifying relevant stakeholders and their roles
- Techniques for effective stakeholder engagement, including civil society organizations and environmental experts

Module 6: Transparency and Accountability in Debt Management

- Promoting transparency in borrowing plans and debt sustainability assessments
- Establishing mechanisms for monitoring and evaluating the social and environmental impacts of debt management decisions
- Ensuring accountability in debt management practices

Tuition: \$4,000

022– Debt Management and Climate Change CEUs: 6.0

Location and Date:

Houston, TX USA: Aug 5-9, Oct 21-25

UYO, NIGERIA: July 15-19

Registration Discount: \$3,900 – You must Register 60 days in advance and payment must be Paid In Full 30 days prior to the start of class.

Course introduction

This course provides a general structure on debt management and climate change. It can be further customized and expanded based on the specific needs and requirements of the target audience.

Course Objectives:

- Understand the relationship between debt management and climate change.
- Analyze the impact of climate change on debt sustainability.
- Explore strategies for integrating climate change considerations into debt management practices
- Identify the role of international frameworks and agreements in addressing climate-related debt risks
- Learn about innovative financing mechanisms for climate change mitigation and adaptation
- Develop skills to assess and manage climate-related risks in debt management.

Course Content Modules:

Module 1: Introduction to Debt Management and Climate Change

- Understanding the linkages between debt management and climate change
- Overview of the potential impacts of climate change on debt sustainability
- Introduction to the concept of climate-related risks in debt management.

Module 2: Climate Change Impacts on Debt Sustainability

- Examining the economic and financial implications of climate change
- Assessing the vulnerability of countries to climate-related risks
- Analyzing the potential effects of climate change on debt repayment capacity.

Module 3: Integrating Climate Change Considerations into Debt Management

- Strategies for incorporating climate change considerations into debt management frameworks
- Assessing the environmental and social impacts of borrowing decisions
- Incorporating climate risk assessments into debt sustainability analyses.

Module 4: International Frameworks and Agreements

- Overview of international frameworks and agreements related to climate change and debt management
- Understanding the role of multilateral development banks and climate finance mechanisms
- Analyzing the implications of global climate agreements on debt sustainability

Module 5: Innovative Financing Mechanisms for Climate Change

- Exploring innovative financing mechanisms for climate change mitigation and adaptation
- Case studies on green bonds, climate funds, and other climate-related financial instruments
- Assessing the potential of these mechanisms in supporting debt management goals

Module 6: Managing Climate-related Risks in Debt Management

- Developing strategies to mitigate climate-related risks in debt management
- Identifying tools and techniques for assessing and managing climate risks
- Integrating climate change considerations into debt restructuring and refinancing decisions.

Tuition: \$4,000

025- Effective Risk- Based Internal Auditing 6.0 CEUs

Location and Date:

Houston, Texas USA: Jul 1-5, Oct 14-18

Course Overview

This course is designed to explore the methods and techniques for developing internal audit plans, conducting risk-based internal audits (RBIA) and providing recommendations for corrective action and improvements. Students learn to develop process audit skills and write effective audit reports that improves long-term results for the company. The primary focus is on how RBIA requires internal audits to be strategically and operationally linked to the business risk and assurance frameworks.

Our goal is to provide a highly interactive, progressive and hands-on professional development environment where participants discuss and address how internal audits add value by providing assurances that the risk management framework, processes, controls and outcomes are maximized. We will do this by bringing forth various issues that impact the effectiveness and maturity of risk management within the organization in order to determine how internal auditors approach their planning and assignments.

Target Audience

Auditors, IA Managers, Project and Contract Managers, HR Managers, Field Managers, Operation Supervisors, Regulators, Key Technical Staff, and others needing a broader understanding of the finance and the auditing process.

Learning Outcomes

After Completing this course, participants will be able to:

- Prepare and implement IA Audit plans and reports
- Illustrate how to use audit checklist and follow the audit trail
- Understand and utilize techniques for managing internal controls and auditing contracts
- Assess the impact of risk and prepare a risk model to use in their real-world work environment
- Identify competencies needed and challenges faced by IA departments

Course Outline

- Internal Audits: Planning and Purpose

Experiential Exercise: The IIA Global Internal Audit Competency Framework

- Assessing Risk in Audit Planning
- The Audit Plan and Report

Experiential Exercise: Preparing an Audit Plan

- Internal Controls
 - The Role of the Internal Audit Department
 - Contract Auditing
 - Internal Audit Best Practices
- In Practice Case Study

Tuition: \$4,000

026- Advanced Strategic Management, Leadership, and Risk Assessment Strategies

6.0 CEUs

Location and Date:

Paris, France: Sep 7-11

Dubai, UAE: Oct 1-11

Amsterdam, Netherland: Aug 19-23

Course Overview

This course is an advanced review of the theory and practice of global management, leadership and risk assessment designed to provide professionals with a more comprehensive examination of the critical competencies needed to execute business strategies effectively and manage risk. Our goal is to ensure that participants will be able to establish clear value metrics, embrace risk and uncertainty, lead through crisis and change, and enhance their ability to make effective critical decisions that result in cost, time, and resource savings that will benefit the organization.

We will do this through a combination of lectures, presentations, and experiential exercises designed to increase understanding of the needs and challenges that impact the global business environment and their effect on the organizations' operations and culture, while placing emphasis on the leadership competencies needed to successfully achieve business objectives and strategic goals. By learning methods and tactics for analysis, implementation and monitoring of risk controls, as well as techniques for financial risk management that minimize exposure and loss, participants will be able to lead the way in classifying and measuring the organization's level of risk while driving positive results and strengthening value.

Target Audience

The course is intended for relevant staffs, officers, managers, senior managers, directors, field managers, administrative managers, commissioners, board members and other key administrators and industry professionals in the public and private sectors.

Course Outline

- International Management: Strategy and Culture in the Emerging World
- Leading Organizational Culture and Achieving Organizational Control

Experiential Exercise: Understanding Your Leadership Style

- Guiding Organizational Change and Innovation

Assessment: Self-Assessment of Change Agent Competencies

- Strategic Crisis Leadership
 - Risk Impact, Mitigation and Management
 - Financial Risk Management: Techniques and Applications
- Case Study: Strategic Financial Risk Management Exercise

Tuition: \$4,000

027 – Advanced Public Procurement Concepts, Contracts, and Practices 6.0 CEUs

Location and Date:

Houston, Texas USA: Nov 13-17

Istanbul, Turkey: Nov 13-17

Course Overview

This course is designed to enable participants to gain an in-depth analysis of well-designed procurement systems that employ principles of economy, efficiency, transparency and accountability to improve social and economic development. The course covers topics such as advanced procurement planning and strategy development, communication and negotiation development skills required by those involved in advanced level procurement, and effective management of contract negotiation, development and administration.

Through use of knowledge management and theory and practice we will ensure understanding of the procurement process in the public sector from an international perspective with focus on contract and supplier management, risk management, performance and quality management and best practices when dealing with suppliers.

Our goal is to equip managers, administrators, and decision-makers with the skills to design and implement strategic initiatives ensuring they position and resource their procurement activity for optimal success. We will do this by bringing forth various issues that provides participants with a comprehensive understanding of key aspects such as developing corporate procurement objectives, understanding the procurement portfolio, and how to manage and align procurement systems, capabilities, and administrative processes with strategic goals.

The objective of this course is to enable government professionals to understand the methods and strategic aspects of the procurement procedure when managing large infrastructure projects including negotiation, risk analysis, contract administration and procurement scheduling and planning.

Target Audience

This Program is designed for Managers, Directors, Commissioners, CEO's, HR, Law Makers, Women political leaders, Legislative clerks and administrators, first ladies, female governors, female deputy governors, senators and any woman aspiring to improve leadership capacity.

Tuition: \$4,000

029- Global Strategy in Uncertain Times 6.0 CEUs

Location and Date:

Houston, Texas USA: Jul 15-19, Oct 7-11

Dubai, UAE: Oct 14-18

Course Overview

This program is more relevant than ever because it presumes high levels of uncertainty, complexity, and velocity in every tool and technique we present. It further covers both the analytical side of coping with uncertainty (what to do) as well as the human side (how to get people to realize the challenges and respond appropriately). In this program, we insist on driving strategic decision making from the perspective of deep insight and differentiating rather than going along with the crowd.

This program focused on the process of finding opportunities, launching new ventures, and leading necessary organizational changes to revitalize and transform an organization in times of uncertainty. Participants will learn how to thrive in rapidly changing and highly uncertain environments and will be able to immediately apply their learning to make rapid progress on an issue they identify. If you have ever worried about how to drive new growth or how to make a change initiative successful, you will enjoy the insights developed in this live online program.

Target Audience

Global Strategy in Uncertain Times is designed for middle, upper- to senior-level executives who seek significant growth opportunities for their organizations.

Course Outline

The program takes place in an interactive delivery format and is designed to address the levels of unprecedented uncertainty we are all facing. A select set of additional readings and materials are also included:

Setting the context:

- an overview of why innovation is no longer optional in the transient advantage economy and the new strategy playbook
- Introduction to an alternative to growth-strangling metrics: Real options reasoning
- Creating an opportunity portfolio

Think Wrong Workshop

- An immersion day on Design Thinking showing you how to unfreeze your thinking to create novel solutions

De-mystifying digital transformation

- how increasingly strategy = innovation = digital
- Discovery Driven Planning, a technique for planning to learn quickly, manage risk, and bring down costs when operating under high levels of uncertainty

An entirely new force in our economy consists of complementors

- learn why you can't avoid understanding this to be successful
- Platform strategies: the newest trend in business models
- The economics and often counterintuitive behavior of two-sided markets
- Why Uber's original business model has flaws as a platform

Disengagement

- how to gracefully shut down a project or end a business
- Create a simple formula for leading organizational transformation, accompanied by a diagnostic
- Customers should not be a mystery – 3 techniques for understanding them better

Learning Outcome

After Taking this course, you should be able to:

- Understand and describe the six elements of your new strategy playbook
- Rapidly evaluate and prioritize the activities currently in your portfolio
- Decide which programs or projects to stop and how to disengage from them
- Explore how to lead through change and uncertainty
- Reframe problems to spark novel solutions
- Smartly plan your digital transformation strategy
- Create plans that facilitate learning rather than assuming knowledge
- Understand the political and implementation challenges of growth
- Identify opportunities to create a 'platform' business model
- Understand how to create important relationships with ecosystem partners
- Gain deep customer insight

030- Leading with Emotional Intelligence: Psychology of Leadership 6.0 CEUs

Location and Date:

London, UK: Jun 17-21

Houston, Texas USA: Jul 15-19, Oct 7-11

The Leading with Emotional Intelligence: Psychology of Leadership is an expert session for those who want to learn the strategies for managing their emotions, staying productive and exercising self-control. It involves interactive discussions and practical exercises; participant capacity is limited. We have been overwhelmed with interest in the seminar.

This AEMPIN Emotional Intelligence session is not only a seminar but a living platform and community to connect, learn, share and commit to action. If you'd like to learn the strategies for managing your emotions, staying productive and exercising self-control, consider taking the "AEMPIN Leading with Emotional Intelligence seminars with our facilitators". Gain the ability to recognize and positively manage emotions in yourself, in others and in groups.

Course Overview

Gain the ability to recognize and positively manage emotions in yourself, in others and in groups.

Recent studies indicate that emotional intelligence is a powerful key to effective leadership. This valuable AEMPIN Leading with Emotional Intelligence training seminar delivers the in-depth knowledge and practical skills you need to ensure that you are a strong, emotionally intelligent leader. You will also learn how to apply emotional intelligence to specific leadership situations to gain the authority and success you strive for as a leader.

Course Objectives

- Gain an honest and accurate awareness of Yourself
- Monitor and adapt your own emotions and behaviors for your benefit and that of your Team & Department
- Have a positive influence on the emotions and motivation of others
- Develop cohesive, emotionally intelligent teams
- Create an atmosphere that fosters emotional intelligence
- Adaptability in dealing with different personalities
- Understand and apply the psychology of leadership

Training Methodology

This AEMPIN Leading with Emotional Intelligence training seminar will combine presentations with interactive practical exercises, supported by video material and case studies. Delegates will be encouraged to participate actively in relating the principles of emotional intelligence to the particular needs of their workplace.

Organizational Impact

- Improve teamwork and team-building skills through greater emotional intelligence
- Enhance cooperation through better relationship building skills
- Develop an emotionally intelligence work environment

Personal Impact

- Learn how to cultivate emotional intelligence competencies
- Effectively manage your own emotions & emotions of others
- Personal growth as an emotionally intelligent leader
- Understand the different personality styles

Target Audience

Anyone who wants to create an emotionally healthy, productive workplace and organizational culture to enhance their effectiveness and their ability to form trusting relationships and manage their frustrations and those of others at work. This AEMPIN Leading with Emotional Intelligence training seminar will keep you current on recent, cutting-edge developments in leadership theory and practice, and help you better collaborate and manage conflict.

Course Outline

- Introduction to Emotional Intelligence
- Psychology of Leadership, Communication for Successful Leadership
- Apply Psychology in Leading in an Emotionally Intelligent Way
- Building an Emotionally Intelligent Team based on Psychological Principles

Tuition: \$4,000

031 - Human Capital Management Challenges and Corporate Sustainability Techniques 6.0 CEUs

Location and Date:

Houston, Texas USA: Jul 15-19, Sep 16-20, Dec 2-6

Course Overview

Each major topic is first addressed by analyzing a case study, and assessing the strength of a specific talent practice (i.e. engagement, succession, retention, etc.) From the case study experience, groups then consider a series of application-based questions they are likely to encounter and must address in the workplace. Participants discuss and debate the issues and share strategies for effectively addressing them.

Following these two experiential sessions, a presentation of 15 to 20 minutes is delivered for each topic. Because the group sessions have dealt with many of the core aspects of the particular talent practice, this module offers a concise focus on new views and next practices.

This course contains practical tools and job aids to help you implement what you've learned as soon as you arrive back at the office. These resources will reinforce the principles learned, help leverage your time and simplify the process of integrating new talent management practices.

Target Audience

Human Capital Directors, Human Capital Managers, Human Resources Managers, Training Managers, Knowledge Managers, Recruitment & Development Managers, Department Managers, Project Managers, Entrepreneurs, and Human Resources Management Consultants. Directors of Human Resources, Directors and Managers of Talent Acquisition and Recruitment, Directors and Managers of Organizational Development, Directors and Managers of Education and Learning, Directors and Managers of Strategy and Workforce Planning, Business Line Managers and Executives, Search, Consulting and Solutions Business Partners and Future leaders in the disciplines of HR, OD or the Line.

Course Outline

- Introduction
- Talent life cycle model and definition
- The Value of Talent Management
- Workforce Planning
- Talent Acquisition
- Developing and Deploying Talent
- Engaging and Retaining Talent
- Leading and Managing Talent
- Integrated Talent Management
- The Role of HR

Tuition: \$4,000

TEXAS SOUTHERN UNIVERSITY

032- Managing Yourself and Leading Others to Higher Performance 6.0 CEUs

Location and Date:

Houston, Texas USA: May 13-17

Dubai, UAE: Jul 8-12

Paris, France: Jul 15-19

Course Overview

Think of the leaders you most admire. They seem to easily juggle competing demands, confidently motivate their teams to achieve optimum results, effectively navigate across the organization, and never lose their composure. These executives make the job look simple—but it's not.

Designed to help managers become more effective leaders, this 10-day program delves into the fundamentals of managing yourself, leading teams, and motivating others to accomplish your company's goals.

Through relevant readings, case discussions, and introspective exercises, you will gain a broader and deeper understanding of organizational culture and dynamics, management best practices, the role of the manager, and the nature of influence. As you explore your own personality, strengths, and weaknesses, you will begin to evolve a leadership style that is uniquely yours. You will return to work with new found confidence and an action plan for continuing your growth as a leader.

Program Benefits

- Improve your performance by strengthening your management skills
- Manage your team, your boss, and your colleagues more effectively
- Develop a management style that suits your unique personality
- Handle difficult management situations with greater certainty in your decisions
- Earn a 6.0 CEUs Certificate of Completion from the Americas Empowerment Institute/Texas University Department of Continuing Education

Course Outline

- Distinguishing management myth from reality
- Understanding the motivations of colleagues and competitors
- Recognizing strengths and blind spots in yourself and others
- Building emotional intelligence to communicate effectively
- Influencing others from a position of authority—or without authority
- Managing within organizational hierarchies
- Earning trust and building relationships
- Leading for long-term results

Target Audience

This management training program is ideal for officers, relevant staffs, new or experienced managers in any function who want to become better leaders. Because management requires analyzing complex challenges, participants should expect to grapple with ambiguous situations that do not have simple solutions.

- Internal Communication
- External Communication
- Speech and Mass Media

Tuition: \$4,000

035- International Best Practices in Project Planning, Monitoring and Evaluations 6.0 CEUs

Location and Date:

Istanbul Turkey: Nov 11-15

Course Overview

The objective of International Best Practices in Project Planning, Monitoring and Evaluations is to equip development practitioners with the knowledge and expertise to be able to conduct their own planning, monitoring, evaluation and reporting or to be able to guide project partners in doing so. A key objective is to increase the capacity of the development sector to deliver project outcomes that are efficient and effective, and to be able to measure and evaluate these outcomes. The course will provide a space for development practitioners to learn from each other by sharing knowledge and experiences.

Course Objectives

Upon completion of the course, the participants will have:

- An improved workable understanding of the key concepts in planning, monitoring, evaluation and reporting
- An appreciation of the purpose and benefits of planning, monitoring, evaluation and reporting
- An understanding of the importance of integrating monitoring, evaluating and reporting into project planning, and an understanding of where they fit into the project cycle
- Knowledge of how to plan a project using the Logical Framework Approach
- Knowledge of how to develop a result-based monitoring and evaluation framework
- Knowledge of the different stages of evaluation
- An improved understanding of the different types of evaluation
- A basic knowledge of data collection and analysis techniques, and their relationship to the different types of evaluation.

Tuition: \$4,000

036- Essentials for Leadership 6.0 CEUs

Location and Date:

Paris, France: Jul 15-19

Houston, Texas USA: Aug 5-9

Course Overview

Essentials of Leadership identifies several of the skill sets that great leaders possess. Through engaging lectures delivered by Americas Empowerment Institute Faculty, dynamic discussions with colleagues and hands-on workshops, participants explore the most crucial areas of leadership. Participants emerge from the program with fresh insights into how to be better decision makers, leaders of people and groups, and agents of organizational change.

Target Audience

Essentials of Leadership is designed for lower and mid-level executives looking to improve their effectiveness working with individuals and teams.

Course Outline

I. Leadership Styles and Emotional Intelligence

- Scope and object

II. Leadership Styles and Managing Change

Key Questions

- What are the key action steps needed to plan and implement change?
- What do you think you do well versus not so well when it comes to planning and implementing change?
- What leadership style makes people more likely to embrace rather than resist change?
- What makes it hard for agents of change to adopt a style that makes others embrace rather than resist change?
- What can be done to overcome the obstacles alluded to in the preceding question?

III. Leadership and Group Dynamics

Why do some groups work together effectively, while other groups seem to struggle?

- How does “who you are” influence the type of roles that you take on in a group?
- What climate do you create for groups that you lead?
- How can you motivate your team to take more risk and responsibility.

IV. Leadership and Personality

- How much of your leadership behavior is driven by your environment?
- How much of your leadership behavior is driven by your own preferences?
- How can you learn about others preferences in order to more effectively lead, manage, and collaborate?

Tuition: \$4,000

037- Telecoms Code of Practice Regulation 6.0 CEUs

Location and Date:

Houston, Texas USA: Sep 16-20, Nov 4-8

Istanbul, Turkey: Nov 4-8

Course Overview

The regulatory agency is empowered to establish minimum Quality of Service (QoS) standards in service delivery for the telecommunications industry. These QoS standards ensure that consumers continue to have access to high quality telecommunications service by setting basic minimum quality levels for all operators.

These standards define the lower and upper bounds of acceptability of such technical issues as transmission rates, error rates, call completion rates, etc. and commercial consumer issues such as access to customer care centers, billing integrity and other characteristics that can be measured and improved. In particular, this seminar is tailored to the application of consumer code of practice in telecommunications by the regulatory bodies.

Target Audience

This course is for Managers, Assistants Managers, Field Managers, Directors, Regulators, Administrative Managers, Commissioners, Board members, Staff members, and Secretaries.

Course Outline

- Scope and object
- Code administration
- Provision of information to Consumers
- Advertising and representation of services
- Consumer billing, charging, collection and credit practices
- Consumer obligations, Protecting of consumer information
- Complaints Handling
- Code Compliance

Tuition: \$4,000

038- Business Essentials for Utility Engineers: Understanding and Influencing Financial Decision-Making 6.0 CEUs

Location and Date:

Houston, Texas USA: Jun 24-28, Oct 7-11

Course Overview

This course is designed to impact business basics central to financial decision-making in the utility industry. It's one of the crucial courses for any regulator and others to overcome financial knowledge deficiencies as it relates to decision-making best practices.

Our goal is to develop knowledge and understanding on how corporate financial management requires the ability to analyze past performance of an organization while also being able to project the future economic consequences of the firm in financial terms. We will do this through review and discussion of methods and tactics in order to build core competencies that prepare participants to make sound decisions that lower cost, maximize shareholder value and provide efficient delivery of utilities with a minimum number of interruptions.

Course Objectives

The objective of this course is to enable utility management professionals to focus on operations and investment and the integration of financial principles into those areas. Through presentations, lectures, review of best practices and experiential exercises in the following key areas, the fundamentals of finance will be taught along with the skills needed to analyze and manipulate financial tools:

- Understanding the language and decision processes of the electric utility business
- Knowing key business concepts and the financial basis of decision-making
- Communicating effectively with finance executives about engineering matters
- Helping ensure that your utility's decisions make good business sense and good engineering sense

Target Audience

This course is designed for the following officials: Power system analysts and engineers, Generation and transmission planners, ISO/RTO technical staff, System operation supervisors, Regulators, Distribution system planners and operators, Managers, Senior technicians and Others needing a broader understanding of the financial basis of decision-making in today's restructured utility industry.

Course Outline

- Understanding Utilities
- Accounting
- Economics
- Finance
- Risk
- Financial Ratios
- Ratemaking
- Budgeting
- Asset Management

Tuition: \$4,000

Additional information, detailed objectives and outlines for each course are available at www.aempin.org

039- Essentials of Project Finance 6.0 CEUs

Location and Date:

Houston, Texas USA: Jun 24-28, Oct 7-11

Course Overview

This course is designed to provide participants with an essential understanding of the principles and approaches to project finance and how to successfully apply practical tools and techniques for project finance valuation, analysis and modeling. Students will interact to explore step by step processes for evaluating project opportunities, checking the viability of the project, project appraisal, risk evaluation, structuring the contract.

Our goal is to provide a highly interactive and integrative professional development environment where participants discuss and address the need in the industry today for a systematic approach for project appraisal and evaluation while learning how to build a Project Finance Model and develop checklists for key stages of the project financing process. We will do this by providing participants with an intensive overview of the core principles and practice of project finance to build a thorough understanding of the crucial factors and techniques used in structuring project finance deals.

Course Objectives

The objective of this course is to enable professionals who work with investment fund and are interested in the principles of analyzing project finance risk and in further understanding the main elements of project finance debt. Participants will gain a deeper knowledge in the important aspects of Project Finance such as cost estimation, project feasibility study, risk analysis and mitigation, and important financial ratios required for project finance modeling through learning and development in the following areas:

- An Introduction to Project Finance
- The Project Finance Process
- Project Investment Criteria
- Managing Project Finance Risk
- Project Finance: Valuation Issues
- Managing the Project Contract
- Documentation and Information Quality

Target Audience

Analysts, Managers, Senior Managers, Directors; Financial professionals including bankers and financial consultants; Project Managers and government officials responsible for project financing and infrastructure investments.

Course Outline

- An Introduction to Project Finance
- The Project Finance Process
Experiential Exercise: Preparing a Feasibility Study
- Project Investment Criteria
- Managing Project Finance Risk
Experiential Exercise: Risk Identification
- Project Finance: Valuation Issues
- Managing the Project Contract
Case Study: Contract Life Cycle Management
- Documenting the Deal and Information Quality

HOUSTON, TX, USA

Houston is the largest city in the Southern United States, as well as the seat of Harris County. It is the principal city of Houston – The Woodlands – Sugar Land, which is the fifth-most populated metropolitan area in the United States.

It's economy has a broad industrial base in energy, manufacturing, aeronautics, and transportation. It is also leading in health care sectors and building oilfield equipment; only New York City is home to more Fortune 500 headquarters within its city limits. Houston is recognized worldwide for its energy industry—particularly for oil and natural gas—as well as for biomedical research and aeronautics. Renewable energy sources—wind and solar—are also growing economic bases in the city.

A multi-cultural city with multicultural institutions and welcome over seven million visitors annually. It's climate is the closest to African climate and houses more Africans than any city in the Americas. With three airports, George Bush Intercontinental Airport is one of the ten busiest passenger airports in the world. An enviable educational system of eight universities and numerous colleges, many people in pursuit of academic excellence end up in Houston. The transport system is made up of rail, road and air transport.
